

**Title:**

CNC Fully Hydraulic Die Forging Hammer and One Die with Multi-piece Forging Technology

**Abstract:**

Reducing production cost and improving production efficiency are eternal themes of forging companies technology progress. This article introduces the application of CNC fully hydraulic die forging and one die with multi-piece forging technology, describes the positive effect of CNC fully hydraulic die forging hammer in shortening process, reducing resource consumption, improving working conditions, increasing productivity and improving forgings quality, which illustrate CNC fully hydraulic die forging hammer has become the modern green forging equipment with high efficiency, energy saving, environmental protection, high-precision and high-reliability features in the forging industry.
